

Green Washrooms

Certified Environmentally Preferred Products

Licence number
UK / 4 / 002

What is a green washroom ?

Going green is no longer simply about using recycled products; it is tied into the ethics of corporate and social responsibility. Being 'green' is about using products that create a healthy living and enhance the working environment. Through considered purchasing and concerted communication, going green can add significant value to the workplace experience.

Green products consider all aspects of their production process including their origin, manufacture, usage and waste disposal. Green products consider the energy efficiency of the manufacturing plants making them, the volume of natural resources used, the emissions created and the packaging used to transport them. Being recycled is simply no longer enough.

manufacturing process – from raw paper pulp to the finished product - was analysed to ensure it met stringent green guidelines. This means that Bay West products are officially 'green washroom' products.

Do you have a Green Washroom?

Over a year, a busy washroom consumes a vast quantity of paper products. Whilst recycled paper products and improved dispenser designs have gone some way to creating a greener environment, this is still not enough for a washroom to be truly green.

Are Bay West products 'green products'?

Bay West have become the first UK 'away from home' brand to provide a range of accredited environmentally preferred washroom products. By attaining the EU Eco-label (see opposite) every part of the

Questions to consider

- What fibres make up your tissues and towels, are they from:
 - 100% post-consumer recycled waste?
 - Virgin fibres from sustainable sources?
 - Virgin fibres from unsustainable sources?
- What chemicals are used in the production process?
- Does the production facility meet EU emission guidelines?
- Is the production facility energy efficient?
- Is washroom waste minimised?
- Are all products dispensed efficiently?
- Can all corrugated packaging and post consumer waste be recycled?

By holding the EU Eco-label, Bay West products have met stringent requirements.

To make your washroom green, use Bay West products.

What is the European Eco-label?

The European Eco-label is Europe's official environmental label.

What does the Eco-label cover?

The Eco-label can apply to goods and services (not food, drink, pharmaceuticals, or some medical products) and criteria have been agreed for each product category.

For a full list of products and services visit www.ecolabel.eu

Many products claim to be 'environmentally friendly', but provide no way for customers to know what standards they meet. Products with the European Eco-label show that they are less damaging to the environment than equivalent brands over their whole life cycle, because they have met a set of published environmental criteria agreed by EU member states after consultation with relevant interests. Eco-label products really are kinder to the environment.

There are technical criteria for a wide range of categories of products, which cover the main environmental impacts generated at all stages of a product's life cycle, including manufacturing, use and disposal.

The European Eco-label was established in 1992 by an EU Regulation. It aims to encourage businesses to develop greener products and to help consumers to identify them.

For full details of the criteria and for additional information please visit the Eco-label website www.ecolabel.eu

- Eco-label products must be independently certified to meet strict published criteria and prevent suppliers getting away with vague environmental claims
- Eco-label applies to all the main environmental impacts of a product over its whole life starting from raw material extraction in the pre-production stage, through to the production, distribution and disposal
- One logo covers many different kinds of products, from electrical goods to paints, and from cleaning products to mattresses
- One label covers the whole of Europe

What has Bay West done to be green ?

Disposables UK holds the licence to manufacture and sell, via a network of distributors, the Bay West range in the UK and Europe. The EU Eco-label licence has been issued for the hand towels and toilet tissues that passed the Eco-label assessment.

Disposables UK, based in West Yorkshire, run clean, modern manufacturing plants that have demonstrated that they meet the highest environmental standards.

The Eco-label considers the following in awarding the accreditation:

- Air emissions of sulphur and greenhouse gases during production
- Water pollution during production
- Emissions of chlorine compounds and organic waste
- Energy consumption during production
- Risk of human health
- Environmental damage or risks relating to the use of hazardous chemicals
- Use of recycled fibres or virgin fibres from sustainably managed forests

This has meant that Disposables UK has had to work with its paper mills and their pulp suppliers as the whole production process - from raw pulp material through to the finished product - had to meet the Eco-label criteria at every stage.

Following extensive auditing and chemical analysis, Disposables UK received the Eco-label for a number of Bay West products under the licence number UK / 4 / 002 and became the first 'away from home' company in the UK to hold the 'flower' for tissue paper products.

In addition to the Eco-label accreditation, Disposables UK also holds BS EN ISO 14001:2004 Environmental Management System Certificate and the BS EN ISO 9001:2008 Quality Management System Certificate.

Conditions for the accreditation of the Eco-label:

- a reduction of discharges of toxic or otherwise polluting substances into waters
- a reduction of environmental damage or risks related to the conversion and use of energy (global warming, acidification, depletion of non-renewable resources) by reducing energy consumption and related air emissions
- the commitment to the need to apply good management principles in order to safeguard forests
- the reduction of risks for human health, environmental damage or risks related to the use of hazardous chemicals
- the minimisation and efficient use of waste

Our Green Washroom products

The following Hand Towel and Toilet Tissue Rolls hold the Eco-label licence (UK / 4 / 002) held by Disposables UK. The PremSoft Micro Folded Towel is produced by our Italian manufacturer under the Eco-label licence (IT/004/012). The Soap Cartridge is produced by our French manufacturers under the Eco-label licence (FR / 30 / 06).

Soap Cartridges

No.	Description	Fragrance	Colour	Case Quantity
9604	Eco-foam Soap	Fresh Blossom	■ Purple	8 x 800ml

DUBL-SERV® VERTICAL

- Perfect for settings where space is a consideration
- 2-roll high capacity reduces continuous service visits
- Reduces waste, roll must be fully used before new roll is accessible
- Translucent dispenser means refill requirements seen at-a-glance

Dispenser Size	W171mm x H315mm x D117mm
Codes	82300, 82330, 82340, 82350, 82360
Colours	■ ■ ■ ■ □

DUBL-SERV® SIDE-BY-SIDE

- Clever compact 2-roll holding dispenser
- Ideal for lower traffic areas or where cubicle space is limited
- Reduces refill visits, only releases a new roll once old one is finished
- Reloading is quick and easy and dispenser is easy to use

Dispenser Size	W275mm x H171mm x D122mm
Codes	72600, 72630, 72640, 72650, 72660
Colours	■ ■ ■ ■ □

REVOLUTION™

- High capacity 3-roll holding toilet tissue dispenser
- Complete roll usage system reduces waste and manpower
- Carousel mechanism delivers continuous supply so no run-out
- Toilet rolls are kept locked, protected, secure and hygienic

Dispenser Size W360mm x H370mm x D160mm

Codes 80302, 80303, 80304, 80305, 80306

Colours

MICRO-FOLDED

- Ideal for settings where space is a consideration
- Smaller towel, more efficient and effective in use
- Simple, modern, attractive design available in five colours
- Holds 300 towels at full capacity reducing chance of run-out

Dispenser Size W223mm x H265mm x D100mm

Codes 53502, 53503, 53504, 53505, 53506

Colours

WAVE'N DRY®

- Totally touch-free dispensing
- Towel is stored fully protected
- Simple to operate by passing hand or arm underneath the infra-red sensor
- Measured dispensing reduces paper consumption and cost

Dispenser Size W305mm x H403mm x D263mm

Codes 80010, 80020, 80030, 80040, 80050, 80060

Colours

OPTISERV™ HANDS-FREE

- Controlled usage dispenser delivering pre-measured towel
- Reduces over-use and wastage
- High capacity dispenser with stub-roll transfer mechanism
- User has limited contact with anything other than their towel

Dispenser Size W308mm x H427mm x D249mm

Codes 86500, 86530, 86540, 86550, 86560

Colours

OPTISERV ACCENT™

- Compact system ideal for areas where space is limited
- Smaller diameter roll which is delivered in pre-measured sheets
- Slightly exposed towel allows hands free dispensing
- Ideal substitute for traditional more costly, less efficient towels

Dispenser Size W310mm x H320mm x D190mm

Codes 85500, 85530, 85540, 85550, 85560

Colours

OPTISERV HYBRID™

- Unique design; electronic, hands-free and manual dispensing in one
- Controlled issue of towel reduces paper use and minimises waste
- High capacity dispenser reduces service costs
- Delivers unfolded towel for a more effective dry

Dispenser Size W301mm x H433mm x D245mm

Codes 87510, 87530, 87540, 87550, 87560

Colours

PUSH BUTTON SOAP DISPENSER

- High capacity, 800ml cartridge gives 2000 doses of foam soap
- Modern, stylish design suits any washroom décor
- Simple pump action means the dispenser is easy to use
- Measured portion pump ensures an effective, hygienic hand wash

Dispenser Size W178mm x H240mm x D110mm

Codes 9600, 9630, 9640, 9650, 9660

Colours

AUTOMATIC SOAP DISPENSER

- Automatic foam soap dispensed by placing hand under sensor
- Total touch-free dispensing reduces risk of cross-contamination
- High capacity, 2000 doses dispenser reduces chance of run-out
- Available in 5 colours for colour coded areas

Dispenser Size W178mm x H240mm x D110mm

Codes 9700, 9730, 9740, 9750, 9760
